POWDER FORMULATIONS
ABSTRACT OF THE DISCLOSURE

This invention relates to new powder formulations consisting of

- (a) at least one agrochemical active compound,
- (b) at least one biodegradable hydroxyl-containing polyester, optionally in a mixture with one or more further biodegradable polymers, and
- (c) optionally, additives,

and which have a particle diameter of under 125 μm ,

and further relates to a process for the preparation of the new powder formulations and to their use for applying agrochemical active compounds to plants and/or their environment.
